Water Update – 400 to 500, 523 to 547, 1600 to 1692

December 1, 2023 – Iqaluit, Nunavut

The brief water interruption for **400 to 500, 523 to 547, 1600 to 1692** has now been resolved.

400 to 500, 523 to 547, 1600 to 1692 remain under a precautionary boil water advisory.

When water pressure drops, the Chief Public Health Officer of Nunavut automatically issues a precautionary boil water advisory. If this water interruption affects your residence, you are under a precautionary boil water advisory.

When the Office of the Chief Public Health Officer informs the City of Iqaluit that the advisory is lifted, we will inform residents.

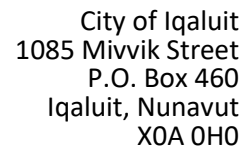

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a **minimum** of one full minute.

It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.
