(a)	Mosha Cote, Manager/Research Liaison, Nunavut Research Institute	NRI Application – “ <i>Community Perspectives and recommendations for managing low impact shipping corridors and marine vessels</i> ” Dr. Natalie Ann Carter, Postdoctoral Fellow, Department of Geography, University of Ottawa, Ottawa, ON	Motion Requested
-----	--	--	------------------

Please identify the individual, the organization, the school, and the home community of those doing the research.

Natalie Carter, University of Ottawa, community researchers will be Iqaluit residents.

Please list a timeline for your work, including dates of consultations and the amount of time you will spend in our community.

November 18-20 youth capacity building and research question co-refinement

November 21-22 knowledge documentation/mapping workshops

November 21-22 knowledge documentation/mapping workshops

Please give the field of study and the subject of study for this project.

Social Science. Community perspectives and recommendations for managing

low impact shipping corridors and marine vessels

Does this project involve any other community than Iqaluit? If so, where and how?

Yes this has been conducted in Arviat, Cambridge Bay, Coral Harbour, Gjoa Haven,

Resolute, Pond Inlet

Briefly, what is your method of data collection? (survey, interview, collection of material, etc)

Focus group discussion which includes mapping of culturally significant marine areas

and recommendations for low impact shipping corridors

The City of Iqaluit appreciates community involvement from researchers. How will your group be willing to communicate your findings to the population?

Results (maps and report) will be shared according to community preferences e.g. radio

call-in show, community open house, facebook posts. Participants and youth community

researchers will validate results before they are shared with the community.

NOTE: This is meant to be a one page summary, please do not exceed the space on this page.
